# Respiratory.Connected

Global issues impacting respiratory care – what do we need to know?

[REGISTER TO ATTEND THE EVENT LIVE](#)

*The session will also be available on demand for registered participants*

## Dear colleagues

With great pleasure, I invite you to join us for this online educational series where we will unpack the latest insights into unmet needs in asthma and COPD, and their clinical implications.

The second event of the Respiratory.Connected educational series will explore the question: global issues impacting respiratory care – what do we need to know? I am delighted to be joined by Dr Mark L. Levy, who will deliver a short presentation on how the management of respiratory diseases fits into wider environmental considerations. Your input is key, so we will be asking you to get involved by voting on polls and submitting questions throughout – with a dedicated slot for discussion after the presentation.

We hope you will join us for what promises to be an engaging and informative session.
